Classes have been hard at work this week – let's see what Maths and Science looks like across the school!

Friday 21st June 2024

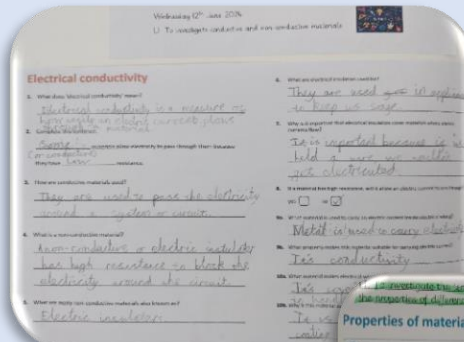

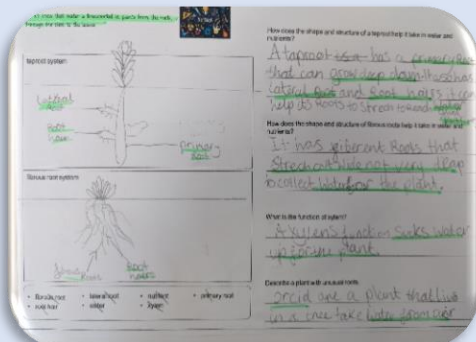

In Maths, Reception Class compared the mass of objects on balance scales, and used *heavier* or *lighter* to describe them. Class 1 practised their positional language to describe directions to solve problems. Class 2 completed journal tasks to find halves of an amount.

Class	Attendance
R	98%
1	80%
2	96.8%
3	93.9%
4	90%
5	97.5%
6	96.5%
Whole School	93%

Class 4 have looked at electrical conductors and insulators and discussed what they are used for in everyday life. Class 3 observed how water travels through the roots of the plant, up through the stem and into the leaves.

In Science, Class 6 studied the electromagnetic spectrum and learnt how it helps us to see different parts of light. Class 5 described the different properties of materials and discussed why different products are made out of certain materials.

Reception Class visited Vauxhall City Farm where they learnt about different animal habitats and made some of their own! Then they met some of the farm animals including sheep, pigs and alpacas.
